

# **2017 TBPG Workshop ATB Roundup**

Abstract

**Gene Petrescu**

The Arctic Testbed and Proving Ground continues to slowly ramp up capabilities. A review of current activities and planned activities will be presented. The primary activities include, evaluation of various satellite products with GINA; A sea ice verification project in collaboration with the Canadian Ice Services and the National Ice Center; facilitating science improvements in the RTMA/URMA and models; evaluating the new Hazard Services Aviation Tool; and evaluating new Ceiling and Visibility Guidance.
